

# LEARN & EXPLORE HOVER QUILTING ZOOM WORKSHOP

with **Peter Byrne**

*Hover-quilting* is a new form of raw edge appliqué, absent of fusible web. This innovative technique produces not only a beautiful controlled frayed edge, but also creates the illusion of your appliqué to hover above the quilt top.

In this class students will move colour like never before! using HST's in a new way to create several design elements such as 'Cathedral Window', 'Pathways', 'Lattice Work", and a 'School of Fabric'.

On day one students will focus on preparing their quilt sandwich, make 36 HST's and glue baste everything in place. On day two students will complete a 16-inch square mini *hover-quilt* and while doing so will learn the unique design elements that make this technique so versatile and creative.

## **Skill Building**

- Raw edge applique
- Machine Applique
- New technique

## **Material List**

- Kit available
- List to make own kit available
